EXECUTIVE SUMMARY

Synergy Enterprises, a multinational FMCG manufacturer with operations in five continents and over 75,000 employees, currently faces challenges due to fragmented and outdated HR systems across regions. The project aims to implement SAP SuccessFactors, a unified cloud-based HR platform, to centralise HR operations, streamline global processes, ensure compliance, and improve employee experience. The expected outcome is an efficient, cost-effective, and globally consistent HR ecosystem that supports strategic decision-making and enhances workforce engagement.

PROBLEM STATEMENT

The HR function at Synergy Enterprises operates using multiple, disconnected systems for payroll, recruitment, and performance management. This has resulted in fragmented and inconsistent employee data, time-consuming manual processes, limited visibility into global HR metrics, high IT maintenance costs, and compliance risks with data protection and

labour laws. These inefficiencies limit HR's ability to support business strategy and negatively impact employee satisfaction.

PROPOSED SOLUTION AND REVIEW OF OPTIONS

Proposed Solution: Implement SAP SuccessFactors Global HR Suite to integrate all HR functions (Core HR, Payroll, Recruitment, Performance, Learning) under a single platform.

Option	Description	Evaluation
Oracle Fusion HCM	Strong HR features, but higher cost and longer deployment	8/10
Workday HCM	Modern and user-friendly, but limited regional compliance support	8.5/10
SAP SuccessFactors	Comprehensive, global, proven for large enterprises	9.5/10 (Selected)

Predetermined Requirements:

- Cloud-based and globally accessible
- Multi-language and multi-currency support
- Integration with existing ERP and payroll systems
- Compliance with GDPR and regional labour laws
- Scalable for future business growth

BENEFITS OF AN UPDATE

Tangible Benefits:

- 30% reduction in HR operational costs within two years
- 50% reduction in manual HR processing errors
- Unified, real-time HR reporting and analytics
- Lower IT maintenance costs

Intangible Benefits:

- Improved employee satisfaction and engagement
- Enhanced global brand reputation through consistent HR processes
- Data-driven strategic decision-making
- Better compliance with international labour and data laws

FINANCIAL ANALYSIS

Cost Item	Estimated Cost (USD)
Software Licensing (SAP SuccessFactors)	\$2,000,000
Implementation & Integration	\$1,500,000
Training & Change Management	\$500,000
Support & Maintenance (Annual)	\$300,000
Total Project Investment	\$4.3 million

Expected Financial Gains:

- Annual savings of approx. \$2 million from reduced manual work and system maintenance
- Payback period: 2 years
- ROI = 39.5% (based on net gains after 2 years)

IMPLEMENTATION RISKS

Risk	Impact	Mitigation Strategy
Employee resistance to change	Medium	Conduct awareness and training programs
Data migration errors	High	Perform phased migration and data validation
Integration issues	High	Use experienced SAP implementation partner
Cost overruns	Low	Monitor budget through Agile sprints and milestones

IMPLEMENTATION PLAN

Duration: 9 months
Methodology: Agile SDLC

- Phases:
1. Initiation & Planning (Month 1) – Stakeholder alignment, project approval
 2. Requirement Gathering (Months 2–3) – Business process mapping, system specifications
 3. System Design & Configuration (Months 4–6) – SAP setup and customization.
 4. Testing & Data Migration (Months 7–8) – Pilot testing and regional migration

5. Training & Deployment (Month 9) – Staff training and full roll-out

Key Personnel:

- Project Sponsor: CHRO
- Business Analyst Team
- IT Development & Integration Team
- Regional HR Managers

CONCLUSION

The proposed implementation of SAP SuccessFactors will modernize HR operations at Synergy Enterprises, creating a unified global HR platform that enhances efficiency, compliance, and employee engagement. We request project approval and funding of \$4.3 million to execute the 9-month rollout and deliver measurable operational improvements within two years.
